Black Europe? Why this title for this exhibition?
Europe is a very interesting continent. This continent has cultural and historical beauties, but also ugly ones if we put aside European colonialism. This continent is the cause of two world wars wars that cost the lives of millions of people around the world and caused billions in damage. The state of Israel arose from these wars, which has not given any peace in the region to this day and has also caused many dead people and costs billions. Thus an undemocratic world order has prevailed since the end of the Second World War.

But Europe is also art and beauty and that's why I tried to show both sides of Europe with this collage exhibition.

I hope you like it. **Arya Bàhram**
